	Section A (Reading) 20marks
Rea	d the given passage carefully and answer the following
	A unique attempt was made on 28th July 1992. "My fight, during the swim was against nature. The Channel water was so cold that I needed much more energy than usual to keep my arms moving. I also had the problem of my legs moving to the left or the right, whichever way the waves were moving. So, I really needed a lot of energy. The water was very salty and when it entered my mouth, I felt sick. Then there were the seaweeds and jelly fish. These fish kept sticking to my body and I felt very uncomfortable." said Janaki.  Despite these problems, Janaki successfully completed her share of the relay. She swam for about two hours and helped the relay team cross the 36 km channel in 14 hours and 45 minutes.
3	Janaki's parents Mr. Nagappa and Mrs. Indiramma anxiously stood on the Dover beach, wondering how things would turnout. "We could not eat a morsel", said Mr. Nagappa. "How could we when our daughter was doing something so dangerous?" But their daughter did triumph, becoming the first handicapped swimmer to part-swim the English Channel.
1	After her success Janaki said, "Although I could not swim solo, I'm happy that I was part of a relay team that helped me fulfil my dream of swimming the English Channel." She believes that the word 'Impossible' is applied to something that has not been tried. "One can overcome all obstacles by hard work, determination, courage, and self-reliance and be successful. But there is really no short-cut to success." said Janaki.
