Section A-Reading (5Marks)

I. Read the passage carefully and answer the questions that follow.

Is Technology Making Us More Connected — or More Alone?

In today's fast-paced world, technology has become an inseparable part of our lives. From smartphones and social media to online learning platforms and virtual meetings, digital tools have transformed how we communicate, work, and learn. Many argue that technology has brought people closer by enabling instant communication across distances, while others believe it has created a culture of isolation and superficial relationships.

On one hand, technology has undoubtedly made communication easier. Families separated by continents can stay in touch through video calls, and students can collaborate on projects in real time. Social media platforms allow people to share experiences, build communities, and access information quickly. During times of crisis, such as natural disasters or pandemics, technology plays a crucial role in keeping people informed and connected.

However, critics point out that excessive reliance on digital communication may weaken real-life interactions. Many individuals spend hours scrolling through feeds instead of engaging in meaningful conversations with those around them. The constant comparison with curated online lives can also lead to feelings of inadequacy and loneliness, particularly among young people.

Moreover, the convenience of online communication sometimes reduces empathy, as face-to-face cues like tone and body language are missing.

Another concern is the impact of technology on attention spans. With endless notifications and instant gratification, people may find it difficult to focus deeply on tasks or maintain patience in conversations. Some educators worry that students are becoming dependent on quick answers rather than developing critical thinking skills.

Yet, it would be unfair to blame technology entirely. Like any tool, its impact depends on how it is used. When balanced with mindful habits, technology can enrich relationships, enhance learning, and open doors to opportunities that were once unimaginable. Setting boundaries, such as limiting screen time and prioritising in-person interactions, can help individuals enjoy the benefits without falling into its traps.

Ultimately, the question is not whether technology is good or bad, but how society chooses to integrate it into daily life. By using technology thoughtfully and maintaining genuine human connections, we can ensure that it serves as a bridge rather than a barrier.

Based on your understanding of the passage, answer the following questions:

1. The central idea of the passage is that technology [1]
 - a) should be completely avoided
 - b) only harms relationships
 - c) has both positive and negative effects depending on its use
 - d) is mainly useful during emergencies
2. Excessive use of technology may reduce empathy because [1]
 - a) people become more knowledgeable
 - b) digital communication lacks face-to-face cues
 - c) technology is too expensive
 - d) people prefer silence
3. How can social media platforms be beneficial during time of crisis? [1]
4. Why do critics believe technology can lead to loneliness? [2]

7	a) Draw the atomic structure of Carbon. b) Write down the symbol and element name in the blank provided. <table border="1" style="width: 100%;"><tr><td>Element name</td><td>Symbol</td></tr><tr><td>Boron</td><td>i.</td></tr><tr><td>ii.</td><td>F</td></tr></table>	Element name	Symbol	Boron	i.	ii.	F	3
Element name	Symbol							
Boron	i.							
ii.	F							
8	An atom of Element X has 4 protons and 5 neutrons. a) What is its atomic number? Justify. b) What is its mass number? c) Identify the element and mention the name along with its symbol. d) State one difference between an element and a compound.	5						
Section C								
9	Which tool is best suited for measuring a curved line? a) Thread b) Ruler c) Yardstick d) Metal rod	1						
NOTE: In the following question, a statement of Assertion is followed by a statement of Reasoning. Choose the correct answer from the following options. a) Both assertion and reason are correct statements, and reason is the correct explanation for assertion. b) Both assertion and reason are correct statements but reason is not the correct explanation for assertion.

GENERAL INSTRUCTIONS:

(i) This question paper consists of 12 questions in 3 sections. Section A is Biology, Section B is Chemistry and Section C is Physics.

(ii) All questions are compulsory.

Q. No	Questions	Marks
Section A		
	Choose the correct answer	
1	Science is best described as: a) Just a collection of memorized facts b) A dynamic way of thinking, observing, and doing c) A guessing game with no rules d) The study of historical events	1
	NOTE: In the following question, a statement of Assertion is followed by a statement of Reasoning. Choose the correct answer from the following options. a) Both assertion and reason are correct statements, and reason is the correct explanation for assertion. b) Both assertion and reason are correct statements but reason is not the correct explanation for assertion. c) Assertion is correct but reason is the wrong statement. d) Assertion is wrong but reason is the correct statement.	
2	Assertion (A): Science is only done in laboratories by scientists wearing white coats. Reason (R): Scientific thinking happens everywhere even in kitchens, gardens, and everyday life.	1
3	What is a scientific method? List the steps of the scientific method.	3
4	One sunny day, Aarav noticed that puddles of water on the playground disappeared after a few hours. Later, he saw dark clouds forming in the sky, and it started raining. His teacher explained that the Sun's heat causes water from rivers, lakes, and oceans to change into water vapour and rise into the atmosphere. The water vapour cools and forms clouds. When the clouds become heavy, water falls back to the Earth as rain. a) What happened to the puddles of water on the playground?	5

	b) What process changes water vapour into water? c) Which scientific attitude is shown by Aarav ? d) What is the process by which water falls from clouds to the Earth? e) Why is the water cycle important for living organisms? (any 2 points)							
Section B								
5	Which of the following is the correct chemical symbol for helium? a) HE b) He c) he d) hE	1						
NOTE: In the following question, a statement of Assertion is followed by a statement of Reasoning. Choose the correct answer from the following options. a) Both assertion and reason are correct statements, and reason is the correct explanation for assertion. b) Both assertion and reason are correct statements but reason is not the correct explanation for assertion. c) Assertion is correct but reason is the wrong statement. d) Assertion is wrong but reason is the correct statement.
